

# Assignment 5 – Recipes

## Overview

---

- Build a website to showcase six recipes.
- There must be a total of seven pages: the home page and six recipe pages.
- Although the styling is (mostly) up to you, you should try to make it visually appealing and easy to use.

## Requirements

---

### *All Pages*

- Header is 100% width and contains the title of your website.
- Left navigation menu contains links styled to look like buttons. The “Home” link should always go to the main page; the other links can go anywhere (but not nowhere).
- Footer is 100% width and contains your name on the left, the course name in the middle, and the submission date on the right.
- The main content area is between the header and footer and to the right of the navigation menu.
- The header, footer, and navigation bar must be styled the same way on all pages, but the styles of the content areas can vary if you want.

### *Home Page*

- The content has six recipe “cards”.
- All cards should have the same visual style and the same width. (It’s OK if they have different heights.)
- Each card should contain:
  - A small image of the recipe, at the top of the card and centered.
  - The recipe title below the image. This should also be a link to the page for that recipe – i.e., clicking on the title takes you to the page for that recipe.
  - A brief description or tag line for this recipe.

## Recipe Pages

The content consists of:

- The recipe title at the top and centered.
- Below the title, three items of information – the number of servings, the calories per serving, and the preparation time – all on the same row.
- A large image (larger than the card image), centered.
- Below the image, two equal-width columns, the left containing the ingredients, and the right containing the directions. Use different styles for the two columns so that it's easy to tell them apart.
