Fundamentals of Web Design - A4 – Tables

Create the table shown below and obey the following conditions:

- Try to match the colors as closely as possible.
- All table borders are thin and gray.
- The columns Flag, Postal Abbreviation, Capital City, Largest City, and Entered Confederation are centered.
- The column Province is left-aligned.
- The columns Population, Land, Water, Total, Commons, and Senate are right aligned, but the titles "Area" and "Seats" are centered.
- The column headings occupy two rows. For columns whose title only requires one row – for example, "Province" – it should span two rows.
- The title "Area" spans three columns.
- The title "Seats" spans two columns.
- When the Capital City and Largest City are the same, a single entry should span two columns – for example, Halifax.
- The "Totals" label in the last row spans six columns.

Provinces and Territories of Canada

Flag	Province	Postal Abbreviation	Capital City	Largest City	Entered Confederation	Population	Area (km^2)			Seats	
							Land	Water	Total	Commons	Senate
	Ontario	ON	Toronto		July 1, 1867	13,448,494	917,741	158,654	1,076,395	121	24
	Quebec	QC	Quebec City	Montreal	July 1, 1867	8,164,361	1,356,128	185,928	1,542,056	78	24
